

Unicenter[®] TCPaccess[™] Telnet Server

Release Summary

6.1

Computer Associates®

This documentation and related computer software program (hereinafter referred to as the "Documentation") is for the end user's informational purposes only and is subject to change or withdrawal by Computer Associates International, Inc. ("CA") at any time.

This documentation may not be copied, transferred, reproduced, disclosed or duplicated, in whole or in part, without the prior written consent of CA. This documentation is proprietary information of CA and protected by the copyright laws of the United States and international treaties.

Notwithstanding the foregoing, licensed users may print a reasonable number of copies of this documentation for their own internal use, provided that all CA copyright notices and legends are affixed to each reproduced copy. Only authorized employees, consultants, or agents of the user who are bound by the confidentiality provisions of the license for the software are permitted to have access to such copies.

This right to print copies is limited to the period during which the license for the product remains in full force and effect. Should the license terminate for any reason, it shall be the user's responsibility to return to CA the reproduced copies or to certify to CA that same have been destroyed.

To the extent permitted by applicable law, CA provides this documentation "as is" without warranty of any kind, including without limitation, any implied warranties of merchantability, fitness for a particular purpose or noninfringement. In no event will CA be liable to the end user or any third party for any loss or damage, direct or indirect, from the use of this documentation, including without limitation, lost profits, business interruption, goodwill, or lost data, even if CA is expressly advised of such loss or damage.

The use of any product referenced in this documentation and this documentation is governed by the end user's applicable license agreement.

The manufacturer of this documentation is Computer Associates International, Inc.

Provided with "Restricted Rights" as set forth in 48 C.F.R. Section 12.212, 48 C.F.R. Sections 52.227-19(c)(1) and (2) or DFARS Section 252.227-7013(c)(1)(ii) or applicable successor provisions.

All trademarks, trade names, service marks, and logos referenced herein belong to their respective companies.

New Enhancements

The following is a list of Unicenter TCPaccess Telnet Server enhancements:

- [Native IP Direct Interface](#)
- [New Commands](#)

Native IP Direct Interface

A native IP direct interface is available between the T04STSSL Telnet Server and CA-TPX. This bypasses the usual SLU-PLU connection between the Telnet Server and CA-TPX thus reducing the number of VTAM LUs needed to establish a session.

New Commands

TNSTAT Command

This command displays statistics similar to the NETSTAT TELNET command. The information is obtained from the common dataspace where the Telnet Servers record information. This alleviates the need to know which stack controls the connection and querying that particular stack. An application interface and TSO TNSTAT command is provided along with an operator command using MODIFY.

TNTERM Command

The APP TNTERM command (operator command via MODIFY) terminates a session at the Telnet Layer for a connection via the T04STSSL Telnet Server. To terminate a session previously, either the VTAM side had to be terminated or the TCP side. This meant the stack had to be identified and the appropriate command issued to the stack (TCPaccess or IBM's TCP/IP). Now using TNSTAT the Server can be identified (if running multiple servers) and a TNTERM command issued to terminate the session.
